

Task 1: **Submit the screenshot for the task -**
Design the dimension table MyDimDate (2 pts)

Upload the 1-MyDimDate.jpg (or .png) file for your peers to review.

TIP: If the screenshot appears small and is hard to read try zooming in by pressing "Ctrl" and "+" keys together (Mac: "Command" and "+"), or Right-click on the image and "View Image" (Firefox) or "Open Image in new Tab" (Chrome).

MyDimDate:
dateid
year
month
monthname
day
weekdayname

PROMPT

Task 2: **Submit the screenshot for the task -**
Design the dimension table MyDimWaste (1 pts)

Upload the 2-MyDimWaste.jpg (or .png) file for your peers to review.

MyDimWaste:
wasteid
wastetype

Task 3: **Submit the screenshot for the task -**
Design the dimension table MyDimZone (1 pts)

Upload the 3-MyDimZone.jpg (or .png) file for your peers to review.

MyDimZone
zoneid
collectionzone
city

PROMPT

Task 4: **Submit the screenshot for the task -**
Design the fact table MyFactTrips (2 pts)

Upload the 4-MyFactTrips.jpg (or .png) file for your peers to review.

MyFactTrips
tripnumber
dateid
wasteid
zoneid
wastecollectedintons

Task 5: **Submit the screenshot for the task -**
Create the dimension table MyDimDate (2 pts)

Upload the 5-MyDimDate.jpg (or .png) file for your peers to review.

```
CREATE TABLE IF NOT EXISTS public."MyDimDate"
(
    dateid integer NOT NULL,
    year integer,
    month integer,
    monthname "char",
    day integer,
    weekdayname "char",
    PRIMARY KEY (dateid)
);
```

PROMPT

Task 6: **Submit the screenshot for the task -**
Create the dimension table MyDimWaste (1 pts)

Upload the 6-MyDimWaste.jpg (or .png) file for your peers to review.

```
CREATE TABLE IF NOT EXISTS public."MyDimWaste"
(
    wasteid integer NOT NULL,
    wastetype "char",
    PRIMARY KEY (wasteid)
);
```

PROMPT

Task 7: **Submit the screenshot for the task -**
Create the dimension table MyDimZone (1 pts)

Upload the 7-MyDimZone.jpg (or .png) file for your peers to review.

```
CREATE TABLE IF NOT EXISTS public."MyDimZone"
(
    zoneid integer NOT NULL,
    collectionzone "char",
    city "char",
    PRIMARY KEY (zoneid)
);
```

Task 8: Submit the screenshot for the task -

Create the fact table MyFactTrips (2 pts)

Upload the 8-MyFactTrips.jpg (or .png) file for your peers to review.

```
CREATE TABLE IF NOT EXISTS public."MyFactTrips"
(
    tripnumber integer NOT NULL,
    dateid integer,
    wasteid integer,
    zoneid integer,
    wastecollectionintons integer,
    PRIMARY KEY (tripnumber)
);
```

PROMPT

Task 9: Submit the screenshot for the task - Load data into the dimension table DimDate. (1 pt)

Upload the 9-DimDate.jpg (or .png) file for your peers to review.

The screenshot shows a database management interface. On the left is a tree view of the database schema. The main area displays a SQL query and its results. The query is: `SELECT * FROM public."DimDate" LIMIT 5;`. The results table has 10 columns: `dateid`, `date`, `year`, `quarter`, `customername`, `month`, `monthname`, `day`, `weekday`, and `weekdayname`. The first five rows of data are shown.

dateid	date	year	quarter	customername	month	monthname	day	weekday	weekdayname
1	2019-01-01	2019	Q1		1	Jan	1	1	Sunday
2	2019-01-02	2019	Q1		2	Jan	2	2	Monday
3	2019-01-03	2019	Q1		3	Jan	3	3	Tuesday
4	2019-01-04	2019	Q1		4	Jan	4	4	Wednesday
5	2019-01-05	2019	Q1		5	Jan	5	5	Thursday

Task 10: **Submit the screenshot for the task -**

Load data into the dimension

table DimTruck. (1 pt)

Upload the 10-DimTruck.jpg (or .png) file for your peers to review.

The screenshot shows a database management interface. On the left is a tree view of the database structure. The 'public' schema is expanded, showing various database objects. The 'Tables (4)' folder is selected, and 'DimTruck' is highlighted. On the right, the 'Query' tab is active, displaying a SQL query: `SELECT * FROM public."DimTruck" LIMIT 5;`. Below the query, the 'Data Output' tab shows the results of the query in a table format. The table has two columns: 'Truckid' (integer, primary key) and 'TruckType' (character varying). The results show five rows of data.

Truckid [PK] integer	TruckType character varying
1	Volvo
2	Scania
3	Volvo
4	Scania
5	Volvo

Task 11: **Submit the screenshot for the task -**
Load data into the dimension table DimStation.
(1 pt)

Upload the 11-DimStation.jpg (or .png) file for
your peers to review.

The screenshot shows the SQL Developer interface. On the left, the 'Schemas' tree is expanded to 'public', and 'DimStation' is selected. The 'Query' window contains the following SQL code:

```
1 SELECT * FROM public."DimStation"  
2 LIMIT 5;
```

The 'Data Output' tab is active, displaying the following data:

Stationid	City
19	Sao Paulo
21	Sao Paulo
31	Rio de Janeiro
32	Rio de Janeiro
40	Brasilia

PROMPT

Task 12: **Submit the screenshot for the task -**
Load data into the fact table FactTrips. (1 pt)

Upload the 12-FactTrips.jpg (or .png) file for your
peers to review.

The screenshot shows the SQL Developer interface. On the left, the 'Schemas' tree is expanded to 'public', and 'FactTrips' is selected. The 'Query' window contains the following SQL code:

```
1 SELECT * FROM public."FactTrips"  
2 LIMIT 5;
```

The 'Data Output' tab is active, displaying the following data:

Tripid	Datedid	Stationid	Truckid	Wastecollected
23475	1	71	133	33.36
23476	1	46	162	34.89
23477	1	40	134	34.69
23478	1	43	148	36.01
23479	1	46	169	37.47

Upload the 13-groupingsets.jpg. (or .png) file for your peers to review.

PROMPT

Upload the 14-rollup.jpg (or .png) file for your peers to review.
